

Urgent care

For urgent care after normal office hours:

1. First call your primary care physician (PCP).
2. Another option is calling **Health Dialog** at **800-308-5848** for professional healthcare advice 24/7.
3. Also think about visiting a participating urgent care center — no appointments are necessary. It could save you time, money, and be more convenient than going to a hospital ER.

Of course, in the event of a serious emergency please call 911 or go to a hospital ER. See your provider directory for details.
